X-PAD Ultimate FAQ Series

Battery Optimization on Junip

More FAQ's like this one are available here: [X-PAD FAQ Series]   Date: 4/28/2023

Thesis

The Android Operating System wants to save power. It trys to do this by putting X-PAD to sleep when the OS feels like nothing is happening. But X-PAD is actively communicating with the GPS/TotalStation! We need to tell the OS to never put X-PAD to sleep.
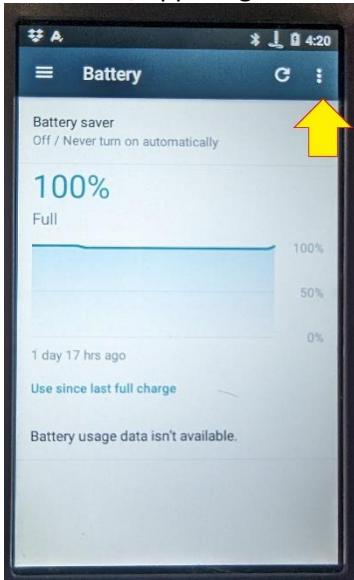

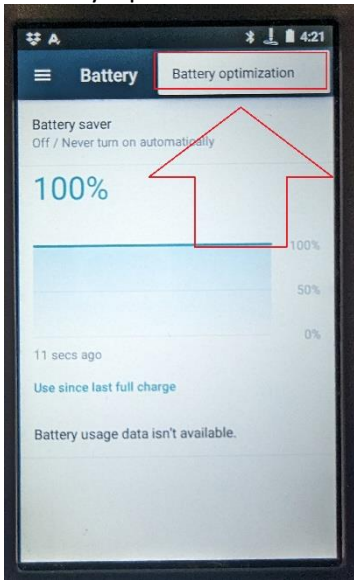

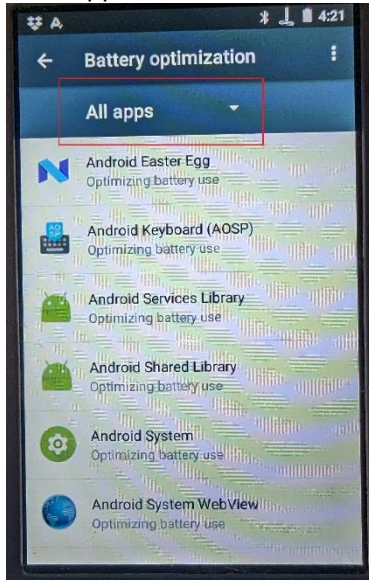

Instructions

Go to Settings: Battery:

Click on the 3-dots, upper right corner:

Click on 'Battery Optimization':

Switch to 'All apps':

Drag to the bottom and click on X-PAD:

Select 'Don't optimize':

Then click on DONE.

If you update/upgrade X-PAD then you may need to make this setting change again.
