# FAQ

## How to Update CHC Receiver Firmware?

**Prerequisites:**
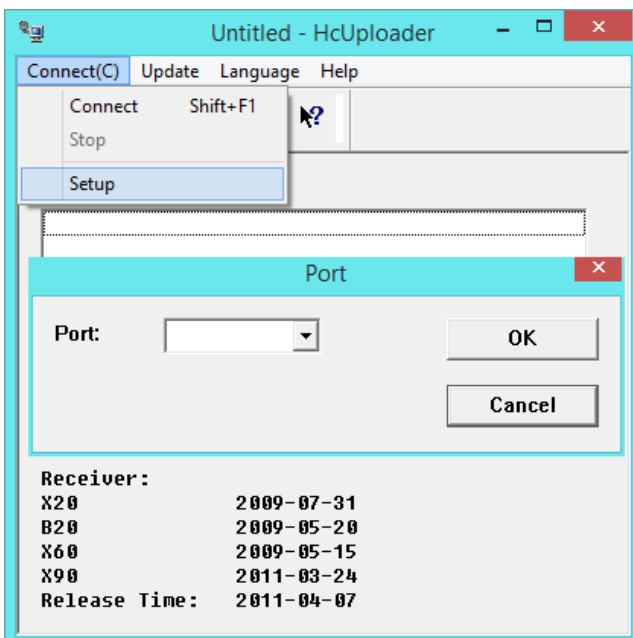

- Hardware:  X91/X900/N71/X90/X20

**Question:**

- How to update CHC receiver firmware?

Please follow the steps below.

1. Connect the receiver to PC with data cable. Please keep the receiver power off.

2. Double click the proper firmware file (.exe), go to **Connect → Setup**, choose the correct port and click **OK**.
   Sometimes you need to run the firmware as administrator.

3. Click **Link** and then **Update**. Then please power on the receiver and the uploading will start automatically.

4. After the processing completes, please close the uploader, and then power off and power on the receiver again.

   Now, the whole update has been finished successfully.

Any other question or problem please send email to support@chcncav.com or contact us online via Skype.

Our Skype ID is chc_support.
